DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15, drawn to a mask, classified in class 430, subclass 5.
 - II. Claim 16, drawn to a method, classified in class 430, subclass 311.
 - III. Claims 17-23, drawn to an apparatus, classified in class 355, subclass 18.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group II and of Groups I or III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the two different apparatus invention, one to the mask, and one to a whole exposure setup, could each be utilized in materially different processes to include over exposure for secondary patterns in the case of the whole exposure apparatus, or in the case of the mask, could be utilized in a process to form a latent image that does not require development as claimed.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1756

4. A telephone call was made to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher G. Young whose telephone number is 703-308-2984. The examiner can normally be reached on Monday-Friday.
